

MUHAMMAD AUN

Full-Stack Developer

Lahore, Punjab, Pakistan | +92 336 1484463 | dev.aunafzaal@gmail.com | [linkedin.com/in/aunafzaal](https://www.linkedin.com/in/aunafzaal) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years shipping production web applications in React, Next.js, Node.js, and Python. Cut deployment incidents by 65%, deployment errors by 30%, and page response times by 25% through CI/CD automation and query optimization across CRM, ERP, and e-commerce platforms. Resolves 50+ technical issues per quarter while sustaining 99% uptime across 5+ production systems, coordinating with cross-functional teams of 5+ on concurrent releases.

Full-Stack Developer focused on building end-to-end web applications and solving complex product and integration challenges. Experienced in owning features across frontend, backend, APIs, and system architecture.

CORE SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React, Next.js, Vue.js, Angular, Node.js, NestJS, Django, Flask, FastAPI

APIs & Databases: RESTful, GraphQL, WebSockets, PostgreSQL, MongoDB, DynamoDB, NoSQL Database Design

Cloud & DevOps: AWS (EC2), Vercel, Netlify, Docker, CI/CD, Deployment Pipelines, System Integration

Data & Automation: Power BI, Pandas, NumPy, Matplotlib, Web Scraping, Chrome Extensions, Discord Bot API

PROFESSIONAL EXPERIENCE

Simula Lab | Software Engineer

Oct 2025 – Present

- Sustained 99% platform uptime across 5+ production web applications by engineering and optimizing full-stack features in React, Next.js, Node.js, and TypeScript.
- Reduced double-booking conflicts by architecting a configurable appointment-booking system with adjustable business hours and 30-minute booking intervals for automotive service businesses.
- Cut product page response times by approximately 25% by optimizing search queries for a secure e-commerce platform with integrated payment gateways, supporting high-traffic sales events.
- Reduced deployment errors by approximately 30% and accelerated release cycles by systematizing CI/CD pipelines and administering production server infrastructure.
- Resolved 50+ technical issues per quarter while sustaining 99% uptime by operating and enhancing CRM infrastructure and corporate WordPress sites.
- Delivered features across multiple concurrent projects on schedule by collaborating with 5+ cross-functional teammates.

AccellionX | Web Developer

Nov 2023 – Sept 2025

- Delivered 10+ production-ready web applications across e-commerce, healthcare, food delivery, ERP, and CRM domains by building full-stack features, improving client delivery timelines for thousands of end users.
- Improved frontend-backend communication and system scalability by designing and integrating 100+ RESTful and GraphQL API endpoints for ERP, CRM, and e-commerce platforms.
- Ensured reliable performance for business-critical ERP and CRM applications by overseeing and optimizing PostgreSQL, MongoDB, and DynamoDB databases across 5+ production services.
- Reduced manual data collection and repetitive workflows for internal teams by building custom automation tools.
- Cut deployment incidents by 65% by deploying and maintaining cloud applications on AWS EC2, Vercel, and Netlify through CI/CD-driven testing pipelines.
- Enabled real-time messaging and notifications by implementing WebSocket-powered chat modules and SMTP notification services.

EDUCATION

Bachelor of Science in Information Technology

The University of the Punjab, Lahore, Pakistan | Aug 2019 – Mar 2024

CERTIFICATIONS & TRAINING

Full Stack Web Developer Certificate — Micro1

- Verified through a proctored technical assessment covering frontend UI implementation, backend API design, and database integration.

IBM Data Analyst Professional Certificate — Excellence Delivered

- Built Power BI dashboards tracking key business metrics; cleaned and analyzed datasets in Python using Pandas, NumPy, and Matplotlib.
